CEPIS Strategic objective 4: Green ICT

“Through active **member engagement**, the purpose is to understand the breadth of this topic area, and agree on **a common area of interest** for **CEPIS** Member Societies, where **CEPIS** can bring relevant and common communications to the relevant **European Institutions**”

Established in March 2010 the members of the Taskforce are:

	AICA
	ATIC
	ATI
	BCS
	CSM
	GI
	HePIS
	ICS
	NGI,VRI
	SI
	VDE

Green ICT Taskforce Main Goals

Products

Mobilizing ICT products end users **in order to change habits** and to ensure that they purchase Green ICT devices

Professionals

Ensuring that the ICT professionals **have the required knowledge** to handle the Green ICT issues and are capable to design Green solutions

Organisations

Awarding organisations that **adopt** and **apply** Green ICT.

Pan European– Green ICT Survey

Target Audience: ICT professionals

Scope: Test the validity of **CEPIS draft position paper**

Questionnaire distributed in 3.000 ICT Professionals

Number of Respondents: 342

Method: Survey Monkey Online Questionnaire

Number of Questions: 33

Purpose:

- A **pan-European snapshot** of how ICT Managers in different countries implement energy efficient methods in their organisations.
- Guide** CEPIS on Green ICT Policy Adoption in Europe

Question 1

Is there an energy manager/ officer for your organisation?

The **energy manager** is responsible for:

- Implementation of the Green ICT practices and services
- Meeting the company's climate targets
- Reduction of electricity costs

Question 2

Does your organisation implement green IT practices?

Question 3

In your opinion why are green IT practices not implemented in your organisation?

-  No pressure from organisation management/customers
-  No official legislation enforcing green IT practices
-  Competitors not doing anything either
-  No agreement on ICT policy between IT department and end-users
-  Employees lack the appropriate knowledge/training

Question 4

When you remove old computers from usage, what procedures does your organisation follow?

- We throw it away with the normal waste
- We store it until we decide what we will do
- We donate it to organizations with charitable status
- We arrange for it to be collected by an electronics recycling company

Question 5

Do you use recycled printer supplies/cartridges?

Question 6

When you dispose of a used ink cartridge or toner, what procedures does your organisation follow?

- We throw it away with the normal waste
- We return it for a small fee to a company that recycles printer accessories
- We return it to the manufacturer company which has a system of waste collection

Question 7

Are there any government directives and/or control systems for energy saving that are implemented in your organisation?

Over a third of organisations in Europe do not implement green IT practices, the most prominent reason being that there is no official legislation in their countries enforcing green IT practices

Question 8

Is there a system that automatically switches off the lights in rooms where no motion is detected for some time?

Question 9

What is the percentage of printers that are connected to LAN and shared with other users?

Question 10

What is the percentage of printers which can print double-sided documents?

Question 11

Do printers that are capable of double-sided document printing, have double-sided printing as the default option?

Question 12

Are there any printing restriction policies in your organisation?

Question 12

Are there any printing restriction policies in your organisation?

Question 13

What kind of reduction measures are in place?

- There is a specific number of users that have the right to print
- There is a monthly limit of printed pages allowed per user
- There is a monthly report that monitors the number of printed pages for each user.

Question 14

Do you ever consider that a device's high levels of energy consumption should be the reason for replacing the equipment you already use?

Question 15

Monitors and computers can automatically turn themselves off after a period of inactivity. Has this option been enabled in your organisation?

Question 16

Is there a system in your company that checks if the employees turn off their computers, printers, monitors and any other equipment when they leave their desks at the end of the day?

Question 17

Is there a system in your company that checks if the employees turn off their computers, printers, monitors and any other equipment when they leave their desks at the end of the day?

Question 18

Have the computer users in your organisation been informed of/trained in energy consumption reduction procedures?

Less than 50% of employees is aware of energy consumption procedures

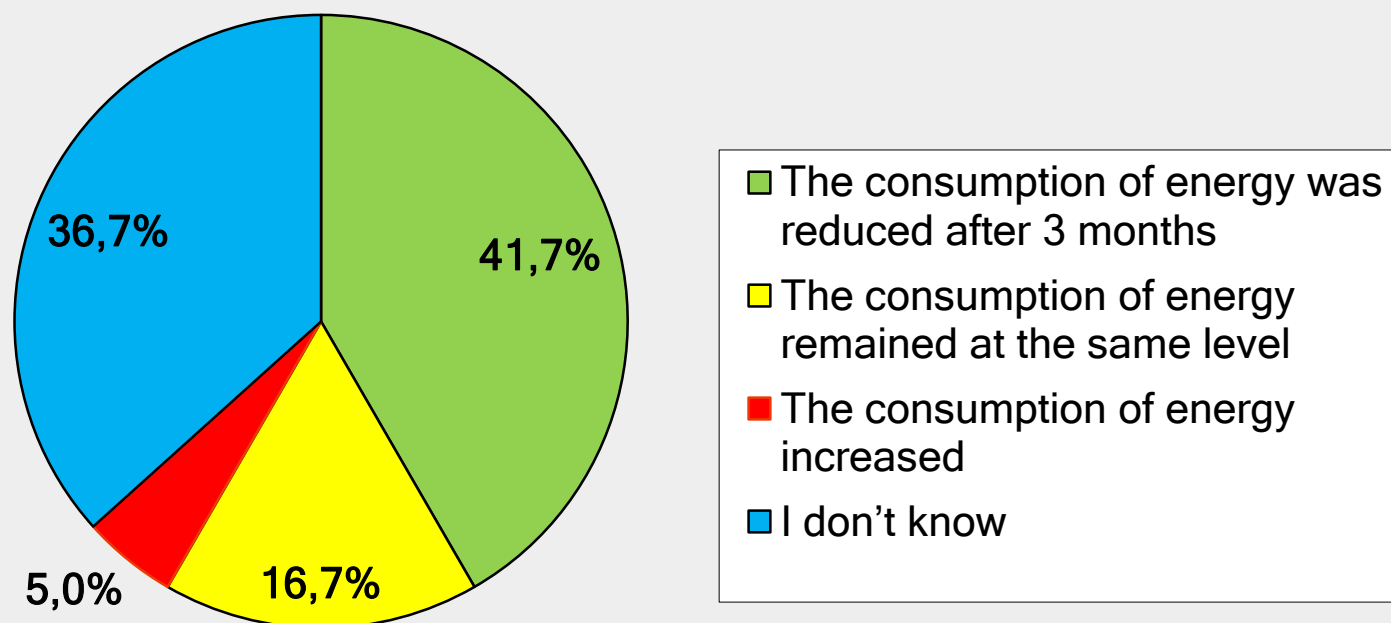

Question 19

Have you developed a system to monitor how employees reduce their energy consumption?

Question 20

What are the results of monitoring employees' energy consumption?

Question 21

Have you developed an energy-management monitoring system in any area of your own IT department?

Question 22

How often is energy consumption measured in your organisation?

Question 23

For many people the product's energy consumption is one of the factors considered when making purchase decisions. Do you take this into account when making a purchase?

Question 24

How important is knowing the level of energy consumption for you?

Question 25

When you decide to purchase IT equipment do you take into consideration whether the product is made of recycled materials?

Question 26

How important is this factor in buying the product?

Question 27

The ISO 14001 quality certificate shows when a process meets official green practice requirements. Does your organisation implement the ISO 14001 standard?

Question 28

The Green Certificate is a tradable commodity proving that certain electricity is generated using renewable energy sources. How important is the Green Certificate for choosing the best supplier?

- Extremely important
- Very important
- Important
- Somewhat important
- Not important

We need:

- To **position** Green ICT issues as key to the agenda of both the European Commission and the European Institutions and to participate in all relevant initiatives and events
- To **ensure** that ICT professionals have the required knowledge to handle the Green ICT issues and are capable of designing solutions and operating systems in accordance to the Green ICT rules
- To **mobilize** ICT products end users in order to change habits and to ensure that they purchase and use ICT devices which are compatible with Green criteria and, in a way, more friendly to the environment

- To **encourage** the awarding of enterprises or organizations that adopt and apply Green ICT and to **motivate** the ones that have not considered the importance of IT yet
- To **promote** the good practices on Green ICT by adopting a Green ICT certification
- To **enhance** the engagement of the Government and decision makers for the dissemination of the Green ICT practices

Thank you!
